Davi Soares

Address: 1845 Fairmount St., Wallace Hall, room 319
Wichita, Kansas 67260

Email : soares.davim@gmail.com
Telephone: +1 (785) 477-9621

Education

- **Kansas State University** — Manhattan, Kansas, USA
  Ph.D. in Mechanical Engineering — *January 2019 – August 2021*
- **University of Campinas** — Campinas, Sao Paulo, Brazil
  Master of Science in Electrical Engineering — *August 2017 – December 2018*
- **Federal University of Itajuba** — Itajuba, Minas Gerais, Brazil
  Bachelor of Science in Electrical Engineering — *March 2010 – December 2015*

Non-degree academic experience

- **Tokyo University of Agriculture and Technology** — Tokyo, Japan
  Visiting graduate scholar — *September 2018 – October 2018*
- **Imperial College London Business School** — London, United Kingdom
  Summer course in Business Strategy and Consulting — *July 2014 – August 2014*
- **Arizona State University** — Tempe, Arizona, United States of America
  Visiting undergraduate scholar — *August 2012 – April 2013*

Professional experience

- **Wichita State University** — Wichita, Kansas, USA
  Tenure-track assistant professor and principal investigator in the Energy systems lab — *August 2023 - present*
- **Freudenberg e-Power Systems** — Auburn Hills, Michigan, USA
  Cell modeling engineer — *August 2021 - July 2023*
- **Kansas State University** — Manhattan, Kansas, USA
  Graduate research assistant — *January 2019 - July 2021*
- **State University of Campinas** — Campinas, São Paulo, Brazil
  Graduate research assistant — *August 2017 - December 2018*
- **JS Insulators Industry** — Mogi-Mirim, São Paulo, Brazil
  Technical commercial analyst — *January 2016 - August 2017*
- **High Voltage Laboratory at Federal University of Itajuba** — Itajuba, Minas Gerais, Brazil
  Undergraduate student researcher — *May 2014 - December 2015*
- **General Electric Transportation** — Erie, Pennsylvania, USA
  3P/new product introduction intern — *May 2013 - August 2013*

Honors & Awards

- **University of Campinas (UNICAMP) Electrical Engineering outstanding alumni award:** 2025
- **Wichita State University young faculty risk-taker award:** 2025
- **Kansas NSF EPSCoR First Award:** 2023-2025
- **Dr. Pau-Chang Lu graduate scholarship:** 2020
- **Naim Z. and Beverly J. Azer Mechanical Engineering graduate scholarship:** 2020
- **Japan student services organization (JASSO) scholarship:** Sponsored by the Japanese government, 2018
- **Master of science scholarship:** Sponsored by *Coordination for the Improvement of Higher Education Personnel*, 2017-2018
- ***Young talent attraction*** **scholarship:** Sponsored by the *Coordination for the Improvement of Higher Education Personnel*, 2014
- ***Science without borders*** **scholarship:** Sponsored by *Institute of International Education*, 2012
- **Medal of Honor:** Awarded the Medal of Honor by Brazilian Army due to discipline during military service, 2008

Publications (student authors are shown in bold; *denotes equal contribution)

[3] D. Soares, "Lithium-ion batteries and beyond: an approach from novel materials and modeling technologies," pp. Universidad Autonoma de Occidente, Cali – Colombia, September, 2024.

Service

College of Engineering service:

- **Collaborations with industry:** organized site visit for Panasonic Energy on campus, which included lab tours, meetings with faculty to discuss opportunities, and an information session for students about career opportunities (Fall 2025).

Department service:

- **Electrical and Computer Engineering graduate committee member:** (Fall 2023 – present).
- **Electrical and Computer Engineering faculty advisor:** (Fall 2023 – present).
- **Electrical and Computer Engineering senior design faculty advisor:** (Fall 2023 – present).

Professional activities

- **Proposal reviewer and panelist for:** National Science Foundation (NSF) - CBET Electrochemical Systems, Department of Energy (DOE)
- **Scientific editor (handling editor with independent decision authority):** Materials Today Communications (impact factor: 4.5), (Fall 2025 - present).
- **Reviewer board member:** Batteries (impact factor: 4.8), (2022 - present); Crystals (impact factor: 2.4), (2026 - present).
- **Member of:** IEEE - Eta Kappa Nu, Tau Beta Pi, and Materials Research Society (MRS).
- **Journal article reviewer:** Nature Nanotechnology, Advanced Materials Technologies, Nanoscale, Journal of Materials Chemistry A, Small Methods, Crystals, IOP Nanotechnology, Energies, Nano-Micro Letters, Molecules, RSC Advances, Scientific Reports, Journal of Alloys and Compounds, Physica E: Low-dimensional Systems and Nanostructures, Journal of the American Ceramic Society, Batteries.

Students supervised

- **Ph.D. advisees:**

1. Eric L. Pereira (Spring 2024 - Spring 2027 (*expected*)). Conducting research on enhanced physics-informed machine learning models for resilient battery-powered infrastructure systems. **Awards:** (i) 2025 Outstanding Graduate Research award; (ii) second place award for Outstanding Research Poster at the NSF 2025 track-1 Adaptive & Resilient Infrastructures driven by Social Equity (ARISE) annual symposium in Garden City, KS; (iii) one of the ten graduate students from the entire university selected to present his research at the Capitol Graduate Research Summit (CGRS) in Topeka, KS.
2. Md Zawad Hossain (Summer 2024 - Fall 2027 (*expected*)). Conducting research on kinetics behavior and its implications on degradation mechanisms of selenide-based transition metal dichalcogenides for nonaqueous monovalent-ion battery technologies. **Awards:** (i) Dora Wallace Hodgson - Outstanding Doctoral Student award; (ii) one of the ten graduate students from the entire university selected to present his research at the Capitol Graduate Research Summit (CGRS) in Topeka, KS.

- **M.S. advisees:**

1. Kolade Oke (Summer 2024). "Mitigating Failures in Battery-powered Flights: Battery Management Through Safety-critical Control".

- **Undergraduate research supervised:**

1. Madison Koester (Fall 2025 - present). "A novel state of health model for lithium metal batteries". Co-author of manuscript accepted at 57th North American Power Symposium (NAPS).
2. Nithish Aravinthan (Fall 2025 - present). "A novel state of health model for lithium metal batteries". First author of manuscript accepted at 57th North American Power Symposium (NAPS); recipient of the 2nd place best presentation award (undergraduate category).
3. Preston Dihn (Fall 2025 - Spring 2026). "Advancing the Detection of Lithium-Ion Battery Chemistries for Recycling and Second-Life Applications". First author of a manuscript accepted at 18th Annual IEEE Green Technologies (GreenTech) conference.
4. Antonio Graciano (Fall 2024 - present). "Characterization of electric field enhancement due to gaseous voids in high-Voltage insulators". Recipient of the 3rd place best research poster at the Annual IEEE Wichita Holiday Banquet – IEEE Wichita section, region 5.
5. Leland Seiwert (Spring 2025 - Summer 2025). "Sustainable development of freestanding low-cost potassium-ion supercapacitor electrodes for high energy density and performance".
6. Damilola Ogun (Fall 2023 - Spring 2025). "Cloud-connected battery management: leveraging Raspberry Pi for real-time state of health monitoring and analysis". Co-authored a journal paper published at ChemElectroChem; first author of a conference proceedings accepted at 2024 IEEE Conference on Electrical Insulation and Dielectric Phenomena (CEIDP); co-authored a conference proceedings accepted at 17th IEEE Green Technologies Conference.

- **Ph.D. Qualifying Exam Committee Member:**

1. AY '25-'26: Harjinder Singh, Mary Tran, Md Raihan Uddin, Abdurrahman Basalan.

- **Committee member:**

1. Murilo Machado Amaral (Ph.D., University of Campinas, Brazil). "Polymer-derived ceramics as sulfur hosts for lithium–sulfur batteries". March 2026.
2. Sean Gierke (M.S. project, Manoharan). "Boom Lowering Energy Recovery in eTLB". December 2025.
3. Landon Olson (M.S. project, Manoharan). "Model-Based Cold-Start Pre-Validation and Failure Detection". December 2025.
4. Darien Pidgeon (M.S. project, Manoharan). "Development of an Interactive Tractor Cab Simulator". December 2025.
5. Guto Garcia Santos (M.S., University of Campinas, Brazil). "Development of cathode $Na_3V_2(PO_4)_3$ and electrochemical analysis applied to sodium-ion batteries". July 2025.
6. Raissa Venâncio (Ph.D., University of Campinas, Brazil). "Advanced Electrolytes for High-Voltage Supercapacitors: An Integrated Electrochemical-Operando Approach". July 2025.

7. Sonu Gangadhar Gowda (M.S. project, Asaduzzaman). "Predicting performance of heterogenerous edge-cloud systems using machine learning models". April 2025.
8. Rama Krishna Nallapuri (M.S. project, Aravinthan). "Performance Evaluation and Energy Analysis of a Hybrid Solar-Fuel cell Source Converter for DC Microgrid Integration". December 2024.
9. Vanderleia de Deus Mateus (M.S., University of Campinas, Brazil). August 2024.
10. Syra Kelly Mubarac Silva Oliveira (M.S., University of Campinas, Brazil). August 2024.
11. Kolade Oke (M.S., Pang). "Artificial intelligence-based distance relay behaviors for future power systems with 100% clean electricity". July, 2024.
12. Rafael Felipe Vicentini (Ph.D., University of Campinas, Brazil). "Raman operando investigation on electrochemical double-layer capacitors". September 2023.

Teaching

- **Educational activity:**

1. Developed a new graduate level course in Battery modeling and characterization (course number ECE 777AE: Characterization and modeling of batteries).

2. Developed two lectures and served as a guest lecturer for ECE 777AF: Controls, Communication and Storage for Transportation Electrification for continuing education programs.

				Student evaluation (Scale 1-5, 5 = Outstanding)	
Course	Level	Year	Enrollment	Course evaluation:	Instructor evaluation:
ECE 463: Applied engineering electromagnetics	Junior	Fall 2023	22	4.10	4.36
		Fall 2024	42	4.08	4.31
		Fall 2025	35	4.33	4.50
ECE 777AE: Characterization and modeling of batteries	Grad. / senior elective	Spring 2024	7	4.57	4.52
		Spring 2025	14	3.80	3.97
		Spring 2025	18	4.31	4.43
		Spring 2026	20	4.31	4.32

Funding

- **NSF ERI:** Project titled "ERI: Controlled Fast-charging Dynamics in Lithium Metal Batteries via Grid-structured Anodes", $198,190, P.I. share: 100%.
- **NSF ENGINES:** Project titled "NSF Critical Materials Crossroads Engine in the Kansas City Region", $185,774.
- **Kansas Aviation and Research Growth Initiative (KART):** Project titled "Lithium Battery Database - Lithium Metal Battery Evaluation", $500,000, P.I. share: 17.5%.
- **Kansas NSF EPSCoR:** Project titled "Enhancing community energy resilience via an AI-driven framework for second-life Li-metal batteries", $67,475, Co-P.I. share: 50%.
- **Kansas NASA EPSCoR:** Project titled "Investigation of ceramic anodes and ionic liquids to enhance thermal stability and energy density in lithium-ion batteries for aerospace systems", $28,950, P.I. share: 100%.

- **Award for Research/Creative Projects in Summer (ARCS):** Project titled "A comprehensive framework for modeling and detecting gaseous voids in high-voltage insulators toward enhanced energy resilience", $4,000, P.I. share: 100%.
- **Summer undergraduate and graduate research assistantships (SUGRA):** Project titled "Sustainable development of freestanding low-cost potassium-ion supercapacitor electrodes for high energy density and performance", $3,999, P.I. share: 100%.
- **Kansas NSF EPSCoR:** Project titled "Physics-informed machine learning model for assessment of state of health of lithium-ion batteries used in resilient infrastructure applications", $67,652, P.I. share: 100%.
- **Multidisciplinary research projects (MURPA):** Project titled "Mitigating failures in battery-powered flights: battery management through safety-critical control", $7,498, P.I. share: 50%.
- **Tim & Laura Unruh faculty support in engineering fund:** Grant awarded to "advance the work on understanding the longevity of rechargeable batteries", $1,500, P.I. share: 100%.
